Engaging New Hires: Optimizing Onboarding and Personalizing Training

Empowering Technical Leaders to Design Onboarding Content

Onboarding is crucial for new hires, setting the tone for their experience with the company. Tailoring content for each department requires a deep understanding of the organization and collaboration with subject matter experts. This process can be time-consuming, especially for learning admins juggling multiple responsibilities.

The value of investing in tailored onboarding content cannot be overstated. It has the potential to pay dividends through improved productivity, reduced turnover, and enhanced employee satisfaction.

Continuous Learning Made Simple

AWS Cloud Quest offers a range of features to help organizations increase employee engagement and promote continuous learning, including group creation, leaderboards, guilds, and insight dashboards.

Collaboration, Competition, and Progress Tracking: The Benefits of Group Creation and Insight Dashboards

The group creation feature enables any member of an organization to establish a new group, promoting collaboration and exploration of new knowledge areas. Each group is equipped with its own leaderboard, fostering healthy competition and motivating employees to hone their skills and remain updated about industry developments. Furthermore, guilds can be created to represent a department or business area, competing against each other to provide multiple levels of competition for teams or individuals.

To ensure that progress is being made, **AWS Cloud Quest** provides insight dashboards for both groups and the company. These dashboards enable users to track progress, analyze areas for growth, and gain insights into individual and organizational progress. With these tools, employees can stay motivated and continue to develop their skills, which ultimately benefits the entire organization by increasing productivity, engagement, and retention

Share your Badges!

Badges provide a tangible symbol of progress and achievement.

Badges drive engagement and motivate employees to continue learning and developing their skills.

As employees earn more badges, they are recognized as experts in their field, which not only boosts their confidence but also enhances their professional reputation.

# Accelerating Skill Development with Customized Learning Paths

Empowering SMEs and Leaders: Customized Learning Paths for Targeted Training

AWS Cloud Quest's custom learning path feature allows technical leaders and subject matter experts to easily create customized training programs using the content available in the game. This ensures that employees receive training that is relevant and effective in helping them develop the skills and knowledge necessary to succeed in their new cloud roles.

Custom learning paths can be assigned to groups, allowing organizations to track employee progress and promote healthy competition among employees through the leaderboard feature. **AWS Cloud Quest** also enables employees to create and organize their own internal training events with customized content, empowering them to take an active role in their own learning and development.

With **AWS Cloud Quest's** custom learning path feature, organizations can ensure that their employees receive targeted training tailored to their specific needs, providing them with the tools and resources they need to succeed in their new roles and perform at their best.

Fuel Your Continuous Learning Journey with Immersive and Engaging Activities

Continuous Learning and Knowledge Expansion through Immersive Challenges

AWS Cloud Quest offers a diverse range of engaging activities that appeal to different interests, such as drones, pets, vehicles, and architecture challenges. These activities come with quiz questions that test your knowledge and understanding of the subject matter. Every correct answer unlocks new pets and architectural puzzle diagrams that allow you to delve deeper into the topics and expand your knowledge.

The side activities and solution building assignments create an immersive and interactive learning experience that keeps learners engaged and motivated to continue learning and growing. By engaging in these activities, learners can apply their knowledge and build new skills, which enhances their learning experience. Demonstration:
